

WELCOME! The vaporizer world is an exciting and fast-changing one, and we know you have a lot of choices. So we're happy

that you've decided to pick up our Grassroots Big Cloud™ We are truly a "grassroots" effort. We have no corporate committees or consumer focus groups. Our products reflect what we personally like and personally use, on the road, in the studio, at home and with our friends. We only produce and sell what we think are the best, most state-of-the-art products that we are proud to share with

Your Big Cloud™ is easy to use, but it has some cool and unique features, so please give this manual a good read before starting. We want to make sure you are having fun and getting everything you can from your Big Cloud™! Also, further instructions, FAQs and videos can be found at www.grassrootsuplifter.com/bigcloud. There are a lot of tips on the webpage that will help you get the most from your Big Cloud™, so be sure to check it out.

LET'S GET STARTED! – PRIMING THE COIL AND FILLING THE TANK

The Big Cloud™ uses what we feel is the best tank available. Constructed of the highest quality food grade stainless steel and quartz glass, the Big Cloud™ tank and coil is the heart of our system and will blow you away with its clean taste and cloud production.

Unscrew top
Fill tank as si

FIRING IT UP

IMPORTANT! Once filled, be sure to immediately screw on the filling cap. The tank will leak out of the air holes if you do not do so.

Filling is quick and easy. Unlike many tanks on the market which must be filled from the bottom (which means you have to first take the tank off the battery), the Big Cloud™ tank can be cleanly and easily filled from the top. Simply unscrew the filling oil cap, fill the oil tank with your favorite essential oil and you're ready to go.

Further details and video instructions are available at www.grassrootsuplifter.com/bigcloud

A few IMPORTANT tips.

First, with any vape, and especially with sub ohm coils that run hot, it is important to prime the coil before using it. This just means making sure the cotton in the coil is soaked

6

with oil before firing it up. The quickest way to do this is unscrew the bottom of the tank and put 2-3 drops (not more!) of your oil directly on to the center of the coil. The other way is to fill the tank and wait at least 15 minutes to allow time for the coil to get fully soaked. To be sure your coil is soaked, it's best to do both. If you take these steps, you'll get more even burning, a better experience and longer coil life.

Second, break your new coil in properly. Start it off at a low power setting (around 15 watts) and gradually work it up to the higher settings. This will ensure the best taste and optimal coil life.

Third, don't let the tank run dry. Dry firing any vape reduces the life of the coil. So be sure to refill once your oil level gets close to the oil hole openings (refill when you get to around a quarter tank left).

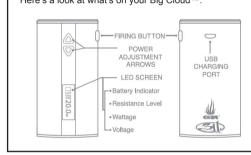

Further details and video instructions are available at www.grassrootsuplifter.com/bigcloud

5

Once your tank is filled, you're ready to go!

Here's a look at what's on your Big Cloud™.

9

Simply hit the firing button five times quickly to power your Big Cloud™ on.

You'll know it's on when the LED screen is lit.

Take a drag on the mouthpiece while holding the firing button down

When you're done, turn off the Big Cloud™ by again hitting the firing button five times quickly. The LED screen will shut down and you'll know it's off. However, leaving it on in standby mode does not significantly drain the battery. These last all day!

10

It's a good idea, though, to turn the Big Cloud™ off when you're not using it. That way there's no danger of it accidentally firing up in your pocket, purse, glove box, etc.

12

COOL FEATURES

MORE POWER! By adjusting the power of your Big Cloud™ you can customize your experience. There is no right or wrong answer as to what power level is best. It all depends on you and your tastes and preferences. Try different power levels with your oils and you'll dial in what works best for you.

- ADJUSTING THE POWER LEVEL. The Big Cloud™ shows its power level in your choice of Wattage or Voltage. To set your preference, simply hit the firing button three times quickly. You'll see on the LED screen what mode you're in. To adjust the power level, press the up or down button. When we're starting out with a new oil, we like to start at a lower level and gradually work our way up until we find the sweet spot. Once you've found the power level

13

you like, you can lock it in by holding the up and down buttons down together for two seconds. You'll see the word "LOCK" on your LED screen. To unlock, just hold the up and down buttons down for another two seconds, and you'll see "UNLOCK" on the screen.

- ADJUSTING THE AIRFLOW. Along with the power level, the air flow level can be fine-tuned to your personal preference. Simply turn the air flow adjustment ring to allow more or less air through the system. Letting more air in is going to give you a cooler vapor. Experiment with the air flow and power level until you find what works best for vou.

- ROTATING THE LED SCREEN. You can rotate the Big Cloud™ LED screen 180 degrees. Just hold down the up and down arrows together for two seconds while the Big Cloud™ is turned off.

11

- RECHARGING YOUR BATTERY. Recharging is simple. Just plug the USB cable into the Big Cloud's™ charging port and charge on your computer or other USB-compatible wall charger or power source. Only use the USB cable and charger provided with your Big Cloud™. While it's charging, the battery level indicator will blink. When it's done, the indicator will light for 10 seconds and go out.

15

- BATTERY FEATURES. To protect against overheating or accidental firing, the Big Cloud™ will automatically shut down if the firing button is held down for more than 10 seconds. You'll see "Over 10s" on the LED screen if that happens. If you're interested in seeing how long your hits are, just check the screen, it automatically shows how many seconds you hit it each time. When the battery needs to be recharged, the LED screen will let you know by locking. Just recharge it and you'll be good to go again. If the screen says "Atomizer Short" that means your Big Cloud™ has detected a short in the system. Replace the coil head if that happens. Finally, if your Big Cloud™ overheats, it will automatically shut down for five seconds and show "Temp Protection" on the screen. It will restart by itself after its five second cool-down.

14

16

COIL HEAD REPLACEMENT

Coil heads don't last forever. When you start to taste a "burnt" taste, or vapor production starts dropping off, you know it's time to switch to a new coil head. Replacing the coil head is simple

17

Just unscrew the tank from the battery. Unscrew the base piece from the tank and you'll see the coil head. Unscrew the old coil, screw a new genuine Big Cloud™ coil in and put it back together. Refill with fresh oil, let it soak for a couple of minutes and you're good to go.

The Big Cloud™ comes with one replacement coil. Additional coils are available at www.grassrootsuplifterstore.com. With heavy use, most people find it's best to replace the coil once a week. Burnt taste or reduced vapor production means it's time for coil replacement.

Further details and video instructions are available at www.grassrootsuplifter.com/bigcloud

18

KEEPING YOUR TANK CLEAN.

You're going to want to keep your tank fresh and clean. This can be done quickly and easily. Remove the tank from the battery, unscrew the top and bottom of the tank, remove the coil head and set it aside (don't wet or wash the coil head!), and clean all of the tank parts with warm WARNINGS

Your Big Cloud™ is not a toy and should be kept out of the reach of children and your pets. Do not store your Big Cloud™ in a high temperature environment. As with any electronic device, keep your Big Cloud™ dry and out of wet or damp environments. In the unlikely event your Big Cloud™ fires continuously or overheats, stop using it and disassemble all parts. If you detect any smell or heat while charging, stop charging it immediately. Only use genuine Uplifter Innovations products and accessories with your Big Cloud™. The use of third party components may damage your Big Cloud™. he Big Cloud™ is designed and intended for use only with essential oils in compliance with all applicable laws.

LIMITED WARRANTY

Uplifter Innovations warrants the Big Cloud™ against defects in materials and workmanship under normal use for a period of ninety (90) from the date of retail purchase by the original end-user purchaser (the "Warranty Period"). If a physical defect arises and a claim is received within the Warranty Period, at its option and to the extent permitted by law, Uplifter Innovations will either (1) Repair the product defect, or (2) Exchange the product with a product

This limited warranty applies only to products manufactured by Uplifter Innovations

that is new or is at least a functionally equivalent product.

This limited warranty does not apply to (a) damage caused by accident, abuse, misuse, flood, fire, earthquake, acts of

21

piracy, or other external causes; (b) damage caused by operating the product outside the permitted or intended use as described by Uplifter Innovations; (c) a product or part that has been modified to alter functionality or capability: (d) cosmetic damage, including but not limited to scratches, dents, and broken plastic; (e) coil heads, which are a consumable item.

This limited warranty applies to original end-user purchaser only, and does not apply should you purchase through a third party reseller such as eBay or Craigslist. The limited warranty only applies to devices purchased at an authorized retailer. For questions regarding authorized retailers, please contact us.
